

Garden Event

10-20-22, 12-1pm, Zoom, Trees for a Changing Climate with Janet Hartin

Description = As the Earth's climate changes, so too must our activities, including plant selection and placement. Janet Hartin from UC Cooperative Extension will talk about climate-ready trees with a focus on results of statewide research that has identified underplanted heat, drought, and pest resistant trees. Learn about the societal and ecosystem benefits these trees provide that include cooling urban heat islands.

Cost = Free
