

Garden Event

2-1-25 through 3-30-25, 3rd & 4th Tuesday, Online, SoilWise Microbial Assessment Certificate

Description = The 131^o School of Compost presents the SoilWise Microbial Assessment Certificate, a two-month online program providing training in soil microscopy and the identification and interpretation of micro-organisms for compost quality and soil health. The assessment approach is based on ecological principles and frameworks designed for anyone who works with soil microbial ecology, including composters, farmers, landscapers, gardeners, designers, educators, and citizen scientists. This course provides a deep dive into qualitative assessments of soil microbial ecology, applied to soil health in various landscape systems (including farming and native soil restoration), as well as composting systems and processes. This online course consists of pre-recorded videos, quizzes, live zoom sessions, and live guest speaker sessions.

Cost = \$00; we are open to sliding scale contributions for the course.
