

Garden Event

2-10-22, 7:30pm, Zoom, Ruth Borun Lecture Series, Finding the Mother Tree with Suzanne Simard

Description = On Thursday, February 10, the Southern California Horticultural Society is pleased to welcome Dr. Suzanne Simard as this year's speaker in the Ruth Borun Lecture Series. Suzanne Simard is a Professor of Forest Ecology at the University of British Columbia and the leader of The Mother Tree Project, which researches forest renewal practices that protect biodiversity against climate change. Dr. Simard's work has been published widely, with over 170 scientific articles in peer-reviewed journals, including Nature, Ecology, and Global Biology. She is also co-author of the book Climate Change and Variability. Her latest book, Finding the Mother Tree, brings us into the intimate world of trees, exploring the ways in which trees learn and adapt their behaviors, remember the past, demonstrate agency over the future, and cooperate with a sophistication typically ascribed to humans. Dr. Simard's research has been communicated broadly through TED Talks and TED Experiences, as well as articles and interviews in The New Yorker, National Geographic, The Globe and Mail, NPR, CNN, CBC, and many more.

This webinar will NOT be recorded or archived on our YouTube channel.

Registration is required to attend online and there will be a \$5. fee for non-members. Register at www.socalhort.org
